

# F.T.C Reuse™ Traveler Washable Epidemic Prevention Kit SOP

## Before traveling:

1. When taking public transportation vehicles, take out the kit and check. There are one re-washable windproof jacket, one re-usable mask, one goggle, two pairs of disposable gloves, one empty bottle, and one Nomex® bag.

2. Please fill in 75% Ethanol Solution into the bottle.

3. Disinfect hand then open the Nomex® take out the jacket, open the zipper of the collar to pull out the hat, open the middle zipper to put on the jacket.

4. Take out the mask, adjust the ear strap. Pay attention to the closeness between your face and the mask.

5. Put on the goggle, even with the glasses. Please make sure that the bottom of the goggle has to be on the top of mask to make the closeness.

6. Put on the hat and tighten the strap to protect the whole face. You can sit in comfort because of the two-way zipper and split in the back. There are pockets in front and both side of the jacket, cell phone and passport can be put in safely.

7. Put on the glove and cover the sleeves. You can keep the outer package to put the used gloves in to avoid infection.

## After traveling:

1. Step1: Take off the gloves and put in its outer package, then throw away.

Step2: Disinfect the goggles with 75% Ethanol Solution.

Step3: Take off the Sun-Eco<sup>®</sup> Photocatalyst mask. Put the outlayer under the light to eliminate the bacterial. There is copper fiber in inner layer to deodor. Spray the ethanol solution on the mask and do the normal laundry after 30 minutes.

3. All the accessories can be put into the epidemic prevention kit after disinfection. The jacket and mask are reusable at least 30 times to lower the pollution from disposable waste.

4. The Nomex<sup>®</sup> bag can be a hat when emergency.

2. Take off the Sun-Eco<sup>®</sup> Photocatalyst jacket and put it under the light to eliminate the bacterial. Nega-Stat<sup>®</sup> conductive yarn is woven to make the bacterial not attach easily. The whole jacket passes the CNS 14798 P2 test. Spray the ethanol solution or soak in 500PPM diluted hypochlorous acid in 30 minutes. Then do the normal laundry.
