

# FUSE YARN

Formosa Taffeta presents a series of the natural-like fabrics named “**Fuse Yarn**”, which offer natural-feel textures and nature-style patterns.

## Thick & Thin:

The yarns appear as if they have layers of different densities, using a multiple color effect, producing a surface that is bright, light and thin.

## Nep:

frost-like patterns are scattered randomly on the fabrics, which add a snowy luster and shine.

## Slub:

The clear bamboo texture offers a three-dimensional feel on the fabric surface.

## Dynamic Over-feed Filament:

symmetrical extending filament patterns can be customized in length and density as required by the orders.

FTC’s “**FUSE YARN**” this series of products provides several unique innovative functional features to meet different demands.

### Ultra Light Cotton-like:

For general outdoor sports clothing, which is light, comfortable and has excellent wicking performance.

### Cotton Feel Comfortable Stretch:

High-quality fabrics with fluffy cotton feel and comfortable elasticity that is ideal for extreme sports.

### Ultra light Weight Stretch:

FTC Ultra Light Weight Stretch is highly-elastic and super comfy, perfect for indoor sports apparel for which elasticity and comfort are the key.
